# WEBINAR

Preparing fair teams for  
challenging situations at  
public events.

Ontario fairs play an important role in connecting the public with food, farming, and the people behind it. Farm & Food Care Ontario invites Ontario fair organizers and staff to join an upcoming webinar to help teams prepare for potential disruptions and navigate conversations about Ontario agriculture with confidence. This practical session will share strategies to help staff and volunteers respond calmly to challenging situations and communicate accurate information about farming. The webinar will be co-presented with AFIMAC, a specialized security company with expertise in monitoring special interest groups. AFIMAC will provide insights on current topics of concern and activities affecting the agriculture sector, along with guidance on preparing teams and managing situations that may arise at public events.

**Date:** Tuesday, May 19, 2026

**Time:** 7:00 – 8:00 p.m.
